OBJECTIVE

Cyber Forensics student with a strong foundation in ethical hacking, coding, and cyber crime investigation, seeking opportunities to enhance knowledge and gain hands-on experience in cybersecurity.

EDUCATION

BSc Cyber Forensic, School Of Technology & Applied Sciences, Edappally. MG University   Expected 2026
Relevant Coursework: Cyber Crime Awareness, CTF Challenges, and a keen interest in cybersecurity and forensics.

Higher Secondary - Biology Science, Nanminda H.S.S, Nanminda   2021 - 2023

SKILLS

Technical Skills	Proficient in Python, C, C++, SQL, Linux/Windows, Networking, Cyber Laws, Wi-Fi, penetration testing, RPI, Arduino, Password Cracking, Forensic Tools, iOT, Git, Cryptography, GPT/LLM.
Soft Skills	Time management, Problem Solving, Critical Thinking, Creativity, Attention to detail and teamwork
Hard Skills	Wireshark, Nmap, Burp Suite, Metasploit, Prompt engineering, Photoshop
Languages	English - Fluent, Malayalam - Native, Hindi,Tamil - Basic

EXPERIENCE

Working Intern   Apr 2024 - May 2024
Kerala Police, City Cyber police station   *Kozhikode city,Kerala*
  · Developed customized password-cracking tools to unlock secured files, enhancing investigation efficiency.
  · Created an IP lookup tool to identify multiple fraudulent websites hosted on the same server, increasing detection rates.
  · Gained practical forensic experience using professional tools like Cellebrite for digital investigations.

CERTIFICATIONS

Certified AppSec Practitioner (CAP) ([link](#))   Jan 2025
 The SecOps Group   - Expertise in application security, secure coding practices, and vulnerability management.

Certified Network Security Practitioner (CNSP) ([link](#))   Jan 2025
 The SecOps Group   - Specialized in network defense, firewall management, and intrusion detection systems.

Google Cybersecurity professional certificate ([link](#))   May 2024
Proficient in Python, Linux, SQL, SIEM tools, and IDS, with expertise in cybersecurity practices and threat mitigation.

Certified Cyber Security Analyst ([link](#))   Aug 2024
CyberWarFare Labs   - Completed C3SA Premium Edition in Cyberwarfare Labs, specializing in advanced cyber defense.

PROJECTS

Passlord: target based wordlist generator. Custom wordlist generator for creating millions of unique passwords based on target details, enhancing cyber attack strategies.. [(Try it here)](#)

FM Frequency Emulator. Broadcasts FM signals in a room using Raspberry Pi and high-gain antennas.

Keylogger. Linux-based keylogger for capturing keystrokes, noted for its effectiveness in bypassing security.

Instagram clone. Phishing awareness tool with a [cloned Instagram site](#) to highlight security vulnerabilities.

EXTRA-CURRICULAR ACTIVITIES

  · Conduct cybersecurity workshops for college students, focusing on practical applications and hands-on learning.
  · Actively write [blog posts](#) on [Medium](#) and publish [repositories](#) on [GitHub](#) Viewed by 3K+ researchers monthly.
  · Volunteer at Kerala Police Cyber Wing, spreading cybercrime awareness.
  · Regularly participating in informative workshops on cyber security, ethical hacking, and technical development.
  · Actively involved in tech communities like TinkerSpace in Kochi, contributing to technical sessions and cyber security initiatives.([link](#))
